

FT-111 panel weighing indicator

product description

The FT-111 panel weighing indicator is a multi-function device for universal use across multiple applications including weighing, labelling, basic peak, hold function and dynamic system monitoring, by way of digital outputs and fieldbus connections. The indicator also allows for 500 records to be saved.

The colour selectable LCD display and the bar graph are helpful in process weighing applications. The indicator uses an intuitive text-based menu guide, allowing for easy operation. The front panel is rated to IP67.
